

## Course 2 – Dev Starter Pack (₹9,999)

**Duration:** 2 – 2.5 Months

### What to Expect

- Build on your coding foundation.
- Learn web development from scratch.
- Mix of theory, live demos, and practice.
- Mini-projects after each major concept.

### What You'll Learn

- Advanced Python – APIs, file handling, OOP.
- Advanced JavaScript – ES6+, DOM, async programming.
- HTML & CSS – Responsive layouts, flexbox, grid.
- React.js & Next.js Basics – Components, props, routing.
- Basic Backend – Node.js, Express.js, APIs.

### Example Projects

- Weather App with API (JavaScript)
- Responsive Portfolio Website (HTML/CSS)
- Blog App with React.js (basic backend)

### Material Provided

- Detailed course notes with visuals
- Source code for all examples
- Practice challenges with feedback
- Project templates for faster building

### Outcome

You'll be able to build responsive websites, dynamic applications, and basic APIs, setting a solid base for becoming a full-stack developer.
