Course 1 – Coding Basics (₹4,999)

Duration: 1 – 1.5 Months

What to Expect

- Beginner-friendly lessons, no prior coding needed.
- Live sessions with Q&A and practical exercises.
- 1-on-1 guidance to clarify doubts.
- Assignments to apply concepts immediately.
-

What You'll Learn

- Introduction to Programming — How computers understand code.
- Python Basics — Variables, loops, functions, conditionals.
- Java Basics — Syntax, data types, control flow.
- JavaScript Basics — DOM manipulation, variables, events.
- Problem-Solving Skills — Logical thinking and debugging.

Example Projects

- Simple Calculator (Python)
- Guess the Number Game (Java)
- Interactive To-Do List (JavaScript)

Material Provided

- PDF notes for each topic
- Example code files for all exercises
- Practice assignments with solutions
- Access to community group for help

Outcome

By the end, you'll be able to write basic programs in Python, Java, and JavaScript, understand core programming concepts, and move confidently to more advanced topics.
